

# Reverse order

[Wersja polska](#)

[English version](#)

Reverse order of given numbers.

## Input

The first line of the standard input contains one integer  $t$  ( $t < 1001$ ) which is the number of test cases.

In each of the next  $t$  lines there is one integer  $n$  ( $n < 1001$ ).

## Output

The  $t$  numbers in reverse order.

## Example

**Input:**

5  
7  
4  
1  
0  
8

**Output:**

8  
0  
1  
4  
7
